

Project Objectives

Date	12 October 2022
Team ID	PNT2022TMID25465
Project name	Predicting the energy output of a wind turbine based on weather conditions.

By the end of this project:

- Able to understand the problem to classify if it is a regression or a classification kind of problem.
- Able to know how to pre-process/clean the data using different data preprocessing techniques.
- Able to analyse or get insights into data through visualisation.
- Applying different algorithms according to the dataset and based on visualisation.
- Able to know how to build a Web Application using Flask Framework.
